CITY OF BOULDER LICENSED TREE CARE COMPANIES

Any person or company performing tree pruning or removal work to either public or private trees in Boulder must be licensed through the city. All license holders listed below have shown proof of worker's compensation and general liability insurance prior to receiving their license. All motor vehicles and major equipment used by any licensee while conducting business must be clearly identified with the business name and phone number.

The two professional license classifications include:

<u>**Certified Arborist**</u> – Licensees in this category have demonstrated a higher level of knowledge and professionalism through successful completion of the International Society of Arboriculture (ISA) arborist certification exam or a comparable exam through the Boulder Forestry office. These license holders are allowed to perform tree work to trees in the public rights-of-way (with prior authorization through Boulder Forestry) and to both public and private trees that are infested/infected with any major pest problem (e.g., emerald ash borer).

<u>**Tree Contractor**</u> – Licensees in this category have chosen not to complete the exam process. *Licensees under this category are not allowed to perform tree work to trees in the public rights-of-way or to both public and private property trees that are infested/infected with a major insect/disease problem (e.g., emerald ash borer).*
