The maps provided are intended to be used as a reference but shall not be relied upon as legal advice or used as a defense to a violation. By way of example and not of limitation, there may be changes to restaurant locations that may not be reflected in the maps. Therefore, it is the MFV operator’s responsibility to ensure that they are operating pursuant to the law. Refer to sections 4-18-2; 9-16-1; 9-6-5(d); 9-6-1(d), B.R.C.

**Potential Mobile Food Vending Site Selection Analysis Process**

First, all zone eligible zone districts, as specified in the ordinance, are selected and areas within 150 feet of residential zones are removed.

Second, sales tax and other city records are used to select properties with “eating places” or “retail bakeries” on them. Areas within 150 feet of selected properties are removed.

Lastly, areas in the public right-of-way are removed.

The remaining areas are the final "Potential Mobile Food Vending Sites". Only the areas shaded are potential sites. All other areas do not allow mobile food vending.
