

Lighting Compliance Checklist

A Compliance Checklist for Complying with the Building Performance Ordinance Lighting Upgrade Requirement

Confirm the Deadline

Buildings are subject to an upcoming lighting upgrade deadline based on their square footage, as shown in the timeline on the website: www.BoulderBuildingPerformance.com. If a building is high-performing, it may be exempt from the lighting requirement. See the Exemption Reference Guide at <https://bouldercolorado.gov/services/building-performance-ordinance#section-1822> for more information on exemptions.

Understand Scope of Requirement

Buildings must meet the minimum lighting code requirements identified below.

- 1) Replace or upgrade an **exterior lighting fixtures** as necessary to meet lighting power allowances for exterior lighting established in the **2012 International Energy Conservation Code (IECC)**; ¹
- 2) Replace or upgrade any **interior lighting fixtures** as necessary to meet lighting power allowances for interior lighting established in the **2017 City of Boulder Energy Conservation Code (COBECC)**;
- 3) Comply with requirements for **automatic time switch control devices, occupancy sensors, and exterior lighting controls** as necessary to meet the **2017 COBECC**.

Conduct an Initial Lighting Evaluation

To determine if the existing building lighting meets the required code, the building owner should complete a whole-building lighting evaluation with a lighting professional. If all or some of the lighting is identified as non-compliant, the lighting professional should provide a scope of work for upgrading the lighting to compliant.

Upgrade Necessary Lighting

For any lighting not already in compliance with the ordinance requirements, implement upgrades to ensure all requirements meet the relevant code. The building owner can select any lighting professional to complete this work. If upgrades are necessary, the provider must go through the permitting process as usual.

Note, an ordinance-specific checklist for electrical permits, the *Electrical Permit Checklist for Building Performance Ordinance*, is available here: <https://bouldercolorado.gov/sites/default/files/2021-07/Electrical%20Permit%20Checklist%20for%20Building%20Performance%20Ordinance%20July%202021%20web%20update.pdf>

¹ Any exterior lighting upgrades must also comply with the [City of Boulder Outdoor Lighting Ordinance](#) passed in 2003 that seeks to prevent light trespass, reduce light pollution, reduce excessive glare, promote energy conservation, and improve safety and security.

□ Apply for Rebates

Don't forget rebates may be available for lighting upgrades. Connect with a PACE Business Sustainability Advisor at Boulder County to identify applicable rebates. Call 303-786-7223 or email info@PACEpartners.com

□ Report Ordinance Compliance to the City

Report compliance with the Ordinance lighting requirement by submitting documentation that verifies compliance with all applicable code sections to the City of Boulder via the online submission form at: https://bouldercolorado.formstack.com/forms/bpo_lighting_compliance_submission

This documentation may include a COMcheck™ PASS certificate OR an [Interior Lighting Compliance Form](#).
