

DCS Update Phase 2
 60% Recommendations (April 2022)
 3.03 Street Trees and Plants
 (A) Tree Selection

Table 3-2: Limitations on Individual Tree Species (proposed changes highlighted in yellow)
(The following table applies to all genus and species unless otherwise approved by the City Forester)

Number of Trees in the Site or Corridor	Maximum Percentage of Any Genus or Species
≤3	100% Genus
4 to 8	50% Genus
9 to 15	33% Genus
16 to 50	20% Species, 30% Genus
≥51	10% Species, 20% Genus

Note: Any exceptions to the above diversity percentages must be approved by the City Manager. Tree availability at the time of construction may impact tree diversity requirements. Genus and species substitutes, as well as revisions to tree diversity requirements will be reviewed on a project by project basis by the City Manager.
