Characteristics of the Conceptual Design Alternatives

**Alternative 1: Mated Sidewalk and On-Street Bike Lanes**
- **Change in storm drainage**
  - Woodland Creek floodplain sec
- **On-street bike lane**
  - Provide buffered bike lane for on-street riders
  - Provide separated bike facility
- **Combination of sidewalks**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater than adjacent property owners.
- **Sidewalk maintenance**
  - Additions of new sidewalks and wider sidewalks, maintenance stalls may be new or greater to adjacent property owners.
- **No change on east side from existing conditions.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Alternative 2: Detached Sidewalk and On-Street Bike Lanes**
- **Combination of detached sidewalk and on-street bike lanes**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **Combination of attached or detached sidewalk and on-street bike lanes**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **No change on east side from existing conditions.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Alternative 3: Combination of Mated & Detached Sidewalks and On-Street Bike Lanes**
- **Combination of attached sidewalk and on street bike lanes**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **Combination of attached or detached sidewalk and on-street bike lanes**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **No change on east side from existing conditions.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Alternative 4: Combination of Attached & Detached Sidewalks and Buffered Bike Lane**
- **Combination of attached or detached sidewalk and on-street bike lane on both sides**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **Combination of attached or detached sidewalk and on-street bike lane on the east side**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **No change on east side from existing conditions.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Alternative 5: Multi-use Path and On-Street Bike Lanes on the north side, Attached sidewalk and buffered bike lane on the east side**
- **Combination of attached or detached sidewalk and on-street bike lane on both sides**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **Combination of attached or detached sidewalk and on-street bike lane on the east side**
  - Has an advantage at driveway alignment
  - Additions of new sidewalks and wider sidewalks, maintenance stalls are new or greater to adjacent property owners.
- **No change on east side from existing conditions.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Obstacles to Plan Implementation**
- **Residential sensitivity to noise and vibration.**
  - More likely to occur in urban areas.
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Summary of Potential Impacts**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**

**Adverse Effects on Environment**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
- **There will be some impacts to the adjacent property including items such as additional sidewalks or maintenance stalls.**
