# **VACATION of Streets, Alleys, and Access Easements**

## **APPLICATION REQUIREMENTS AND CHECKLIST**

An application for vacation of city right-of-way or an access easement must include the information necessary to demonstrate compliance with the vacation criteria adopted by City Council (attached). These requirements are summarized below and are listed on the Land Use Review Application Form. An application fee, as specified on the application form, is also required. In addition, an applicant may submit any additional materials which may be appropriate to the review.

All required materials must be included along with a complete form in order for an application to be accepted by the Planning and Development Services Center. Incomplete applications will not be accepted and will be returned to applicant. For right-of-way vacations, all owners of properties adjacent to the right-of-way must consent to the application and sign the application form. For access easements, all owners of underlying property must consent to the application and sign the application form.

Please use the list below as a checklist, marking those items as they are included in your application. The checklist is intended to assist the applicant in collecting all of the required materials and to assist the Planning and Development Services Center in determining that all of the application requirements are met.

### Vacation Application Requirements

- 1. A complete **Land Use Review Application Form**, including signatures by or the written consent of the owners of all property to be included in the development.
- 2. A completed **sign acknowledgment form**, signed by the applicant, indicating that the applicant understands his/her responsibility to post a public notice sign on the subject property.
- 3. An **improvement survey** or improvement location certificate by a registered surveyor of the subject property.
- 4. A **legal description** of the subject property.
- 5. A **vicinity map** indicating the site and adjacent streets. If the site is less than one acre, the map must be drawn at a minimum of 1":200'.
- 6. A **written statement** which describes the proposal and addresses how the vacation meets the city criteria (attached).
- 7. All **site development plans**, drawn to an identified scale, which delineate the easement or right-of-way proposed to be vacated.
- 8. A **legal description of the right-of-way or easement vacation area** prepared by a licensed surveyor. Label the easement description with a header "Exhibit A" and include a subheading which says "Page 1 of X".

- [ ] 9. A **scaled exhibit map** that shows the subject property and the right-of-way or easement area to be vacated. Label the map with a header of "Exhibit A" and include a subheading which says "Page X of X". Include crosshatching in the easement area to be vacated (for clarity when copying document) and the total area of easement to be vacated. Please note that the map must be copied to scale.
- [ ] 10. Signatures from **electric/gas, telephone, and cable** company representatives (use attached form).
- [ ] 11. The vacation **fee**, as stated on the Land Use Review Application Form.
- [ ] 12. Any other information that the applicant wishes to submit.

### **Vacation Criteria \***

These criteria apply to requests by property owners for vacations of streets, alleys, and access easements, or portions thereof.

City Council may approve requests by property owners for vacation of easements or right-of-way, in accordance with the following criteria:

1. It is presumed that easements or rights-of-way were originally acquired or dedicated for a valid public purpose. Applicants seeking to vacate said portions of properties bear the burden to show that the change is not contrary to the public interest.
2. All agencies and departments having a conceivable interest in the easement or right-of-way must indicate that no need exists, either at present or conceivable in the future, to retain the property as an easement or right-of-way, either for its original purpose or for some other public purpose.
3. The applicant must demonstrate, consistent with the Boulder Valley Comprehensive Plan and the city's Land Use Regulations, either
  - a) that failure to vacate an existing right-of-way or easement on the property would cause a substantial hardship to the use of the property consistent with the Boulder Valley Comprehensive Plan and the city's Land Use Regulations, or
  - b) that vacation of the easement or right-of-way would actually provide a greater public benefit than retaining the property in its present status.

\* Approved by City Council on November 10, 1980

## LAND USE REVIEW AND TECHNICAL DOCUMENT REVIEW PROCESS SUMMARY

The Planning Department coordinates discretionary reviews through a Land Use Review process. The various review types are listed on the Land Use Review Application Form and include annexation, site review, use review and preliminary plat for subdivision. The Land Use Review process is summarized here.

### Pre-Application

If you are considering filing a development review application, a pre-application review may be beneficial. An interdepartmental city staff team is available to answer questions about applicable regulations, application requirements, and how they may affect a project on a particular site. Many pre-application questions can be answered without need for a meeting. Occasionally, staff will determine that a meeting will be the most effective approach. Pre-application review is optional; however, there are certain types of projects and reviews for which city staff recommends a pre-application review. Please refer to the pre-application review brochure for more information.

### Application

A request for Land Use Review is made by completing and submitting an application to the Planning and Development Center. Land Use Review applications are accepted daily. **Bimonthly deadlines are at 10 a.m. on the first and third Mondays of each month.** A case manager is assigned to each application and manages the land use review process for the individual project. The case manager also serves as the primary contact for the project in interactions with other city departments, the applicant and the public.

### Review Schedule

Each application is assigned to a "track" based on availability of staff resources to conduct the review. The track assigned determines the land use review schedule which the project will follow and helps applicants to gauge the time needed to complete the review process. A generalized diagram of the land use review process appears below. Once a review track has been assigned, the city commits to this time schedule, assuming the applicant meets appropriate deadlines. In addition, the schedule may be accelerated or a project placed on a later track based on the applicant's response time, the number of revisions, and staff, Planning Board or City Council work volume.

### Basic Steps in the Land Use Review (LUR) Process

### Reviewers

The land use review process includes review by the Development Review Committee (DRC), which is made up of representatives from city departments and other referral agencies. Each representative provides review and comment about how the application complies with code and policy requirements within their area of responsibility. When the interests of individual departments diverge, developing consensus is the responsibility of the Policy Resolution Group (PRG), made up of supervisors of Planning and Development Services and the City Attorney's Office.

### Initial Review and Review of Revised Plans

Public notice, by mail and posting a sign on the property, occurs during the initial review. The applicant is responsible for posting of a sign that is issued by the Planning and Development Services Center.

During a project's initial review, a summary of the city's findings, a list of requirements and informational comments are identified and given to the applicant in the form of Development Review Results and Comments.

Projects are reviewed for conformance with development standards and requirements and some are evaluated against qualitative design criteria. City comments and/or a decision are issued approximately three weeks after the start of the assigned review track.

*Issuance of the Development Review Results and Comments concludes the services covered by the initial application fee. Any additional time spent by staff after this point is subject to hourly billing or by revision fees where applicable.*

The case manager is available to meet with the applicant to review and discuss the city comments. After considering the issues identified in the initial review, the applicant is given the opportunity to propose revisions. Revisions must be submitted, or a written request for continuance received within 60 days from the date of city comments; otherwise, staff will either take action on the latest plans on file or the application is voided. Revised applications are evaluated by DRC staff members and review of revision comments are issued by the case manager within 15 working days after the start of the assigned review track. Up to two revisions may be filed for each project.

### **Decisions/Call-ups/Appeals**

Depending on the potential impact, Boulder's land use regulations assign approval authority to either city staff, Planning Board, or both Planning Board and City Council. After the completion of staff review, the Planning Department either issues a staff decision or refers the project to the Planning Board or City Council. For site review, use review and subdivision (at final plat review), a "Notice of Disposition" is issued. This is a one- or two-page document stating the decision and listing any conditions of approval. These decisions are final after a 14-day "call-up" period. Staff-level decisions may be called up by the Planning Board for a final decision or appealed to the Planning Board by the applicant or any interested person. Planning Board decisions are also issued as dispositions and are final after a 30-day call-up period. Board decisions may be called up for review by City Council with a majority vote of City Council in favor of the call-up. Decisions by Planning Board and City Council are made following public hearings at regularly scheduled meetings.

Several types of Land Use Review applications do not have dispositions issued and follow a slightly different review process at the time of the project decision. For example, out-of-city utility permits are approved by city staff and subject to a call-up by the City Council. Annexations follow a state law approval process, including a recommendation by the Planning Board and approval of an ordinance at two readings by City Council. For additional information on the steps towards a final decision for a particular application type, please refer to the application attachment for the review type or contact the Planning and Development Services Center.

### **Technical Document Review and Permit Review**

The conditions of approval for most Land Use Review applications will generally require several documents to be prepared, filed and recorded depending on the review type. These may include final plans (architecture, site, landscape), a subdivision final plat and agreement, a development agreement, engineering plans, and dedications of easements or rights-of-way.

For city review and approval of these technical and final documents, *the applicant files a Technical Document Review application*. The Technical Document Review process (TEC DOC) is similar to Land Use Review (same application deadlines, but no hearings are involved).

After the required technical documents have been approved, the applicant may file a building permit application for any new construction. Information on building permits is available in the Planning and Development Services Center (303-441-1880). The applicant may also need to obtain other permits to complete the project, including growth management allocations and floodplain development permits.

### **Expiration of Approval**

For site and use reviews, the applicant must begin and substantially complete an approved project within three years from the date of final approval (or as modified by a specific development schedule). If a project is not completed within three years, or according to the project's approved development schedule, the approval expires. If the project is not completed within this time frame, the applicant may request administrative extension of the development approval. Up to two six-month extensions can be granted by staff. After that, extensions can only be granted by the Planning Board, after a public hearing, and upon a showing by the applicant that reasonable diligence has been exercised to complete the project.
